ABOUT ME

Results-driven RPA Developer with hands-on expertise in UiPath automation, Python/VB.NET scripting, API integration, and compliance systems. Experienced in building end-to-end automation solutions and automation-driven backends that streamline operations and deliver measurable business value.

SKILLS

- UiPath (Studio & Orchestrator)
- Automation Backends: React, FastAPI, PostgreSQL
- Data Extraction & Web Scraping
- VB.NET & Python Scripting
- API Integration (REST, JSON, Webhooks)
- Excel VBA Macros & Google Sheets

PROFESSIONAL EXPERIENCE

Abacus Consulting — Client: Fragomen

RPA Developer (Automation & Compliance Systems)

Feb 2026 – Present

- Automated the Nitaqat Saudization compliance process end-to-end, replacing manual HR tracking with a rules-driven automation system covering 14 profession categories and 5 nationality-based quotas.
- Built an automated two-way compliance simulation engine aligned with official MHRSD and Qiwa thresholds, automatically calculating permissible expat hiring based on Saudi national headcount changes and vice versa.
- Automated user access provisioning, session control, and audit logging (SuperAdmin, Admin, HR Manager roles) with JWT-based authentication and 90-day password rotation, eliminating manual audit tracking.
- Designed and automated Excel VBA macro systems for Business Visa risk scoring across five modules, automatically classifying applicants and generating visa category recommendations for client HR teams.
- Engineered a Python-based automation engine to process GCC national, Ajeer worker, and special-case headcount calculations, including automated error/edge-case handling for division-by-zero scenarios.
- Used React/TypeScript and FastAPI/PostgreSQL as the delivery layer for the automation platform, translating RPA and business-rule logic into a client-facing compliance portal.

Sybro Tech

RPA Developer

Oct 2024 – Jan 2026

- Designed and deployed 50+ end-to-end RPA solutions using UiPath across sales, logistics, and finance operations, integrating bots with HubSpot, Unleashed, Shopify, MachShip, and Google Workspace via REST APIs and webhooks.
- Automated email-driven workflows with Outlook integration, using LLM-based logic for ticket categorization and automated CRM updates.
- Built automated data-extraction bots for websites, client portals, and mobile app interfaces, removing manual data entry from downstream processes.
- Used VB.NET, Python, and JavaScript for advanced scripting within UiPath workflows; managed Orchestrator scheduling and exception handling, and built Power BI dashboards for automation KPI tracking.

University of Central Punjab

Final Year Project — RAG-Based Automation Assistant

Mar 2023 – Jul 2024

- Developed an intelligent university admissions assistant automating query handling using RAG, real-time speech interaction, and vector database search. Stack: HTML/CSS/Bootstrap, Flask, Mistral 7B, Nvidia Audio2Face.

EDUCATION & CERTIFICATIONS / EXTRACURRICULAR ACTIVITIES

UiPath Certified RPA Developer

Automation Developer Associate

Data Analytics and Visualization Certification

Accenture North America and PwC

Bachelor of Computer Science 2020 – 2024
