ABOUT ME

Results-driven RPA Developer and Computer Science graduate with hands-on expertise in UiPath automation, API integration, and data-driven process optimization. Experienced in designing and deploying end-to-end automation solutions that streamline operations, enhance accuracy, and reduce manual effort. Passionate about leveraging AI and intelligent automation to drive digital transformation and deliver measurable business value.

SKILLS

- UiPath (Studio & Orchestrator)
- API Integration (REST, JSON, Webhooks)
- Data Extraction & Web Scraping
- VB.NET & Python Scripting
- Email & Outlook Automation
- Excel & Google Sheets Automation

PROFESSIONAL EXPERIENCE

SYBROS TECH

RPA Developer

Oct 2024 - Present

- Designed, developed, and deployed end-to-end RPA solutions using UiPath, driving efficiency across sales, logistics, and finance operations.
- Integrated automations with enterprise platforms, including HubSpot, Unleashed, Shopify, MachShip, and Google Workspace, leveraging APIs and webhooks for real-time data synchronization.
- Automated complex email-driven workflows using Outlook integration, enabling automatic ticket creation, categorization (via LLM prompts), and CRM updates to streamline customer communication.
- Built data extraction and validation bots for websites and portals, ensuring accurate, high-frequency data updates to Excel and Google Sheets.
- Utilized VB.NET, Python and JavaScript for scripting, debugging, and advanced data manipulation within UiPath workflows.
- Ensured reliability through exception handling, error logging, and schedule management in UiPath Orchestrator.
- Collaborated with stakeholders to identify process automation opportunities, document workflows, and deliver scalable, maintainable solutions aligned with business goals.
- Automated a mobile application using UiPath, developing a workflow to scrape and extract structured data directly from the app interface, improving data collection efficiency and accuracy.
- Created concise Power BI dashboards to track automation performance and KPIs for management visibility.

University of Central Punjab

Final Year Project

Mar 2023 - Jul 2024

- Developed an intelligent virtual assistant to streamline university admissions, leveraging retrieval-augmented generation (RAG) for enhanced interaction.
- Implemented a real-time speech interaction system followed by a search in a vector database
- The system generates context-based responses, which are integrated with Nvidea Audio2Face.
- Technologies Used: HTML, CSS, Bootstrap (Frontend); Flask (Backend); Mistral 7B (LLM Model); Nvidia Audio2Face.

Freelance Data Analyst

July 2024 - Oct 2024

- Managed multiple projects involving data cleaning and preparation using Excel and Python.
- Created data-driven insights through Power BI visualizations to support client decision-making.
- Applied basic data modeling techniques and exploratory analysis, incorporating foundational machine learning principles.

EDUCATION & CERTIFICATIONS

UiPath Certified RPA Developer

Automation Developer Associate

Data Analytics and Visualization Certification

Accenture North America

Bachelor of Computer Science 2020 - 2024

University of Central Punjab, Lahore

Intermediate in Pre Engineering 2018 - 2020

Punjab Group Of Colleges, Lahore

EXTRACURRICULAR ACTIVITIES

Qualified and recommended for ISSB 2022

Led a team in multiple tasks, and took initiative in speeches, verbal tasks, and interviews.

Tree Plantation Drive 2024

Al-khidmat Foundation
